PROFESSIONAL SUMMARY

Computer Science diploma student and backend-focused developer with hands-on experience building and deploying full-stack applications using JavaScript, Node.js, Express.js, MongoDB, and REST APIs. Experienced in authentication, authorization, database design, and AI API integration. Solved 400+ LeetCode problems with strong foundations in Data Structures & Algorithms. Seeking a software development internship or entry-level opportunity.

TECHNICAL SKILLS

Languages: C++, JavaScript, Python, SQL

Frontend: HTML5, CSS3, JavaScript, React.js, EJS

Backend: Node.js, Express.js, REST APIs, Middleware

Databases: MongoDB, Mongoose, MySQL

Authentication & Security: JWT, Passport.js, Session-Based Authentication, Authorization

AI / APIs: Google Gemini API, REST API Integration

Tools: Git, GitHub, VS Code, Docker

PROJECTS

LifeXP - Gamified Productivity Platform

Tech Stack: JavaScript, Node.js, Express.js, MongoDB, Mongoose, Google Gemini API, JWT Authentication

- Designed and deployed a gamified productivity platform that converts real-world tasks into challenges with XP, levels, streaks, and leaderboards.
- Built a responsive vanilla HTML/CSS/JavaScript frontend connected to a Node.js/Express backend through REST APIs.
- Implemented JWT-based authentication and authorization for protected API routes, user sessions, and secure access control.
- Integrated Google Gemini API for dynamic challenge generation and developed social features including friend requests, challenge categories, XP tracking, leaderboards, and user statistics.

TempChat - Temporary Messaging Platform

Tech Stack: Node.js, Express.js, MongoDB, Mongoose, EJS, JavaScript, Authentication

- Developed a server-rendered messaging platform that lets users communicate without sharing personal contact information.
- Implemented authentication, authorization, and friend-request workflows to manage user connections and conversations.
- Engineered configurable message and chat deletion behavior, including a 2-hour automatic deletion window.
- Designed backend routes and MongoDB models for users, friendships, and conversations, then deployed the application on Render.

Airbnb-Style Booking Platform - In Development

Tech Stack: Node.js, Express.js, MongoDB, Mongoose, Passport.js, Joi, EJS, EJS-Mate

- Developing a full-stack accommodation-booking platform with authentication and authorization using Passport.js.
- Building property listing, review, and session-management features backed by MongoDB models and Joi validation.

EDUCATION

Government Polytechnic Unnao

Diploma in Computer Science & Engineering (CSE) | Expected Graduation: 2027 | CGPA: 7.5+

Class X: 80% | Class XII: 76%

CERTIFICATIONS

Delta - Full-Stack Web Development Course | Apna College

ACHIEVEMENTS

- Solved 400+ LeetCode problems covering arrays, strings, linked lists, trees, dynamic programming, and graphs.
- Independently designed, developed, debugged, and deployed multiple full-stack applications incorporating authentication, REST APIs, and AI integration.

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

- Communicate effectively in Hindi and English and collaborate on technical projects.
- Demonstrate ownership by taking software projects from idea to implementation, including development, debugging, and deployment.
